

American Experiences Survey:

A Nationally Representative Multi-Mode Survey

November 2020 Omnibus Results - COVID Items

Overview of Methodology

Each month, Consumer Reports fields the American Experiences Survey (AES) to track consumer attitudes and behaviors over time. November results are based on interviews conducted from November 5-16, 2020. This document focuses on the section of the omnibus survey related to COVID-19.

The survey was administered by NORC at the University of Chicago through its AmeriSpeak® Panel to a nationally representative sample. Interviews were conducted in English and in Spanish, and were administered both online and by phone. In total NORC collected 2,851 interviews, 2,563 by web mode and 288 by phone mode. Final data are weighted by age, gender, race/Hispanic ethnicity, housing tenure, telephone status, education, and Census Division to be proportionally representative of the US adult population.

The margin of error for results based on the total sample is +/-2.58 percentage points at the 95% confidence level. Smaller subgroups will have larger error margins, and only those subgroups for which there are at least 100 unweighted cases are included.

TOPLINE RESULTS WITH MONTHLY TRENDS

The COVID questions presented below were shown to respondents in this order unless otherwise noted. Where appropriate, question verbiage, response answer choices, or direction of scales were randomized or rotated and those instances are noted below.

Also shown, where available, are trends over time. Not every item was asked on every recent omnibus survey, and where minor revisions to the wording of an item or response choices were made, they are noted below. *Note these changes may impact comparability of results*. Beginning this month, we have oversampled English-speaking Asian Americans. In previous months, fewer than 100 were included, so trend information is not available for this group.

Note that the November omnibus contained one other section (the COVID-19 section being unusually long this month). This section, presented after the COVID-19 sections, contained items on bedroom use and sleep.

Prepared by CR Survey Research Department, December 2020

www.cr.org

Survey Notes for Monthly Trends

November 2020 (current report) results are based on interviews conducted from November 5-16 with a nationally representative sample of 2,851 US adults.

October 2020 results are based on interviews conducted from October 8-26 with a nationally representative sample of 2,670 US adults.

September 2020 results are based on interviews conducted from September 11-21 with a nationally representative sample of 2,303 US adults.

August 2020 results are based on interviews conducted from August 7-19 with a nationally representative sample of 2,236 US adults.

July 2020 results are based on interviews conducted from July 9-20 with a nationally representative sample of 2,031 US adults.

June 2020 results are based on interviews conducted from June 4-16 with a nationally representative sample of 1,014 US adults.

May 2020 results are based on interviews conducted from May 8-18 with a nationally representative sample of 2,085 US adults.

April 2020 results are based on interviews conducted from April 2-14 with a nationally representative sample of 2,164 US adults.

Far too little	4	4	6
Have not visited local businesses since outbreak began	3	3	6
Base: All respondents	2,835	2,297	1,014

^{*}Note: In June, 1% said either Refused or Don't Know. These were included rather than based out, so June only sums to 99%.
