

American Experiences Survey:

A Nationally Representative Multi-Mode Survey

June 2020 Omnibus Results - COVID Items

Overview of Methodology

Each month, Consumer Reports fields the American Experiences Survey (AES) to track consumer attitudes and behaviors over time. June results are based on interviews conducted from June 4-16, 2020. This document focuses on the section of the omnibus survey related to COVID-19.

The survey was administered by NORC at the University of Chicago through its AmeriSpeak® Panel to a nationally representative sample. Interviews were administered both online and by phone. In total NORC collected 1,014 interviews, 911 by web mode and 103 by phone mode. Final data are weighted by age, gender, race/Hispanic ethnicity, housing tenure, telephone status, education, and Census Division to be proportionally representative of the US adult population.

The margin of error for results based on the total sample is +/-4.12 percentage points at the 95% confidence level. Smaller subgroups will have larger error margins, and only those subgroups for which there are at least 100 unweighted cases are included.

TOPLINE RESULTS WITH MONTHLY TRENDS

The COVID questions presented below were shown to respondents in this order unless otherwise noted. Where appropriate, question verbiage, response answer choices, or direction of scales were randomized or rotated and those instances are noted below.

Also shown, where available, are trends over time. Not every item was asked on every recent omnibus survey, and where minor revisions to the wording of an item or response choices were made, they are noted below. Note these changes may impact comparability of results.

Note that the June omnibus contained five blocks of questions (items on consumer priorities, COVID, scams, teletherapy, and net neutrality). Respondents saw the consumer priorities block first and the net neutrality block last. As the scams and teletherapy blocks were somewhat related to COVID, they were randomized with other COVID question blocks, shown following the consumer priorities block, with general COVID concern items first.

Prepared by CR Survey Research Department, July 2020

Survey Notes for Monthly Trends

June 2020 results are based on interviews conducted from June 4-16 with a nationally representative sample of 1,014 US adults.

May 2020 results are based on interviews conducted from May 8-18 with a nationally representative sample of 2,085 US adults.

April 2020 results are based on interviews conducted from April 2-14 with a nationally representative sample of 2,164 US adults.

COV3. [RANDOMIZE ORDER OF COV3 WITH BLOCKS ON SCAMS & TELETHERAPY (NOT SHOWN).]

While many people are suffering from financial consequences of the coronavirus (COVID-19) outbreak, others are saving money because they're going out less, using fewer services, have fewer activities to pay for, etc.			
Would you say you are saving more money than you are losing, losing more than you are saving, or about the same?			
For this question, please do not include retirement accounts, stocks, or			
other long-term savings.
