## Notes

The Lunchly lunch kits were tested in 2025. The other lunch kits were tested in 2024.

mcg = micrograms.

ppb = parts per billion.

\*Inorganic arsenic was not measured because total arsenic levels were not high enough to pose a health risk based on CR's risk assessment for a person 4 years or older consuming up to two servings per day.

\*\*12 oz. drink was not tested for heavy metals.

ND = Not detected above the Method Detection Limit (MDL).
